

EDU-CODE

Fostering Coding Education in Europe

Helping adults to acquire basic knowledge of computer programming, promoting an active and conscious use of IT in households

OUR GOALS

- Enhance the understanding of a hype-connected world and environment through increased knowledge of software and coding;
- Empower people by increasing their capacity to solve problems, work in teams and think analytically;
- Develop a training system to provide adults with the basic knowledge of computer programming;
- Promote an active and conscious usage of IT tools in households

OUR TARGETS

Adults and young adults (over 20 years old) with at least a secondary education level and who are currently not engaged in formal educational paths independently if they are working, seeking for a job or inactive on the labour market.
